Venus Yan

(814) 251-1438 | yan.q@wustl.edu | Open to Relocate | linkedin.com/in/venus-yan/

EDUCATION

Washington University in St. Louis, St. Louis, MO
MS in Artificial Intelligence Engineering (Intended) — Expected Graduation May 2029
BS in Computer Science — Expected Graduation May 2028

Juniata College, Huntingdon, PA — CS GPA: 3.88/4.0 | General GPA: 3.6/4.0
BS in Mathematics & Computer Science — May 2026

PROFESSIONAL SKILLS

Technologies: C/C++, Python, Java, SQL, R, PyTorch, MySQL, MongoDB, AWS, Azure, Docker, Git/Github
Languages: English(full professional), Chinese(native)
Related coursework: Parallel and Concurrent Programming, Database Management Systems, Software Engineering, Data Structures and Algorithms, Intro Machine Learning and Pattern Classification

WORK EXPERIENCE

Juniata College, Huntingdon, PA — Jan. 2025-May 2026
Student Developer/Team lead for Juniata Web Development

- **Led team of 5** by coordinating tasks for student developers, communicating with campus stakeholders to clarify requirements to align solutions with user needs, ensuring consistent and timely delivery.
- **Overhauled backend logic** and SQL queries for work order system by merging new user options and streamlining repetitive processes through iterative logic to increase extensibility and maintainability.
- **Used JavaScript, HTML/CSS, Microsoft SQL Server** to design and maintain web applications.
- **Proposed and integrated UI/UX enhancements**, including clearer instructions and **automated error prevention** for incorrect job types, **reducing average task completion time by 30%+**.

Arete College, Shanghai, China — Jan. 2023-May 2023
Developer for SmartArete (Wechat Mini-program)

- **Developed 5 core features**—login/sign-up, attendance tracking, absence reporting, voting, and event announcements—for a campus mini-program serving student academic and social activities.
- **Built dynamic UI components** with JavaScript, WXML, and WXSS and implemented **database CRUD operations** and **local caching** to improve data access and application responsiveness.

PROJECT EXPERIENCE

Juniata College, Huntingdon, PA — Mar. 2026-Jun. 2026
Student Researcher for AI Agent Development in Education

- Migrated web application to new **AI APIs** and **redesigned application workflows** leveraging **Copilot**, **FSMs**, **JavaScript** and **Cloudframe**, enhancing **AI response consistency and workflow reliability**.
- Refined AI interaction parameters and instructions to improve performance and interactivity of AI-assisted language learning application, **raising children's engagement by 25%+**.

Juniata College, Huntingdon, PA — May 2025-Sep. 2025
Student Researcher for Dataset Distillation

- Implemented **model-pool-based gradient-matching** framework for dataset distillation in **PyTorch** across 6 neural network architectures, **reducing dataset size by 76%** while increasing Top-1 accuracy by 0.5 percentage points.
- Integrated **knowledge distillation** using KL divergence and cross-entropy loss to refine cross-architecture generalization across ConvNet, MLP, LeNet, AlexNet, VGG11, ResNet18.

LEADERSHIP / ADDITIONAL EXPERIENCE

Vice President – Chinese Club	Juniata College	Jan. 2024-May 2026
Infodesk Worker – Statton Learning Commons (Library)	Juniata College	Aug. 2024-May 2026
Delivery Operations Co-Manager – Ele.me	Zhejiang, China	May 2023-Aug. 2023
